

## URLs and IP Addresses to allow

Below is a list of the URL Listings and IP Addresses used when purchasing from Office Depot, its 3rd party vendors, and dynamic caching partners (CDN). If your network has security restrictions that block access to the URL's and IP's on the list, the performance of the ODP Business Solutions site may be impacted. If you are having difficulty viewing and navigating our site, please provide this list to your Network Administrator(s) and ask that the URL's and IP's be 'allowed' on your network.

Since many 3rd party vendors also use CDN's or Internet Caching Technology companies, their IP's may be listed as "dynamic". A static IP address is most likely only temporary, as many of the CDN's change IP's frequently. Additionally, (as CDN's are designed to do this), an IP address will resolve according to the geographic region of the requestor, or to your closest destination server for that CDN provider.
